

Sommaire

S. Ballet et R. Rolland	
Families of curves over finite fields	5-18
P. Bruin	
Computing coefficients of modular forms	19-36
B. Conrey	
Applications of the asymptotic large sieve	37-46
P. Lebacque et A. Zykin	
Asymptotic methods in number theory and algebraic geometry	47-73
M. Mohyla et G. Wiese	
A computational study of the asymptotic behaviour of coefficient fields of modular forms	75-98
C. Ritzenthaler	
Optimal curves of genus 1, 2 and 3	99-117
M. Watkins	
Computing with Hecke Größencharacters	119-135
