

## Sommaire

M. J. Bertin	
Mesure de Mahler et série $L$ d'une surface $K3$ singulière .....	5-28
F. Brunault	
Régulateurs $p$ -adiques explicites pour le $K_2$ des courbes elliptiques .....	29-57
H. Cohen	
Some formulas of Ramanujan involving Bessel functions .....	59-68
C. Delaunay et C. Wuthrich	
Some remarks on self-points on elliptic curves .....	69-84
G. Gras	
Analysis of the classical cyclotomic approach to Fermat's last Theorem .....	85-119
F. Hajir	
Asymptotically good families .....	121-128
D. Solomon	
Equivariant $L$ -functions at $s = 0$ and $s = 1$ .....	129-156
L. Thomas	
On the Galois module structure of extensions of local fields .....	157-194
